

# Getaways Now!

Team 5: Sarah Parisi, Charles Pierce

# Project Overview

- Getaways now is a vacation rental application where users can view and book their next home away from home.
- Our application allows both providers and customers the ability to manage their profiles and seamlessly search and access listings.

# Users Base and Shared Functionality

Both customers and providers can...

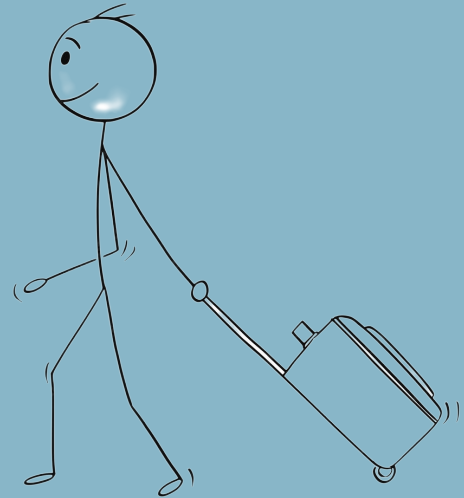

- Create Profiles
- Manage Profile information

# Customer Functionality

Customers Can:

- Search for listings in their desired vacation location
- Compare listing prices
- Book rentals
- Save their favorite rental homes
- Leave reviews on homes they have rented

# Provider Functionality

Providers can...

- Create/Edit Property Listings
- View property statistics and bookings
- Reply to reviews on listings

# Conclusion

This Concludes our brief overview of our project. Now onto the demo!
